

National Quality Reporting Crosswalk for Critical Access Hospitals (Updated May 2018)**Using this Crosswalk****Purpose and Organization of the Crosswalk**

This Crosswalk is intended to provide users with a basic understanding of quality reporting initiatives taking place on a national level involving critical access hospitals (CAHs), including the lead organization and purpose of such initiatives, the measures used by each initiative, and any overlap in measures across initiatives.

[Using this Crosswalk](#)

This tab provides an overview of the Crosswalk purpose, layout and technical tips for use.

[National Quality Initiatives](#)

This tab provides an introduction to seven national quality reporting initiatives that CAHs are involved with, including the name, lead organization, high-level overview, focus areas, and quality measures for each.

[Measures](#)

This tab provides a different view of the measures by program area so that the user can see the overlap between different programs.

[Acronyms](#)

This tab provides a list of acronyms used throughout the Crosswalk along with their definitions.

Navigating the Measures Tab

The Measures tab contains information on each of the measures tracked by the various national quality reporting initiatives. Within each table, rows one through six comprise the header and are frozen, as are columns A and B, the Measure ID and Measure Name. This allows the user to scroll across to learn more about a measure, while still seeing the Measure ID and Measure Name. The user can also scroll down to see additional measures, while still seeing the column headers.

Each national reporting initiative (listed in columns C through G) is made up of at least two components: the Medicare Beneficiary Quality Improvement Project (MBQIP) has required and additional measures across four domains, eCQM has measures assigned to two of the CMS Meaningful Measures categories, Hospital Improvement and Innovation Networks (HIINs) have core and additional measures, the CMS Hospital Inpatient and Outpatient Quality Reporting Programs have many components, and two priority areas are included for the Quality Innovation Network-Quality Improvement Organization (QIN-QIO) initiative. For each measure included within an initiative, the component area is listed. For example, OP-18 is listed as a required measure for MBQIP under the Outpatient domain, while *C.difficile* is listed as an additional measure under the Patient Safety/Inpatient domain.

The title of each reporting initiative contains a hyperlink that will take the user to the reference used to populate the information about the measures for that initiative. The final column titled "Measure Specifications/More Information" contains links to the primary source of specifications or additional information for the measure.

Information Sources

Hyperlinks to information sources are included on both the National Quality Initiatives tab and the Measures tab.

National Quality Reporting Crosswalk for Critical Access Hospitals

National Quality Initiatives

Initiative	Lead Organization	Overview	Focus Areas	Quality Reporting Measures (measure detail on following page)
Medicare Beneficiary Quality Improvement Project (MBQIP)	Health Resources and Services Administration (HRSA) Federal Office of Rural Health Policy (FORHP)	The goal of the Flex Medicare Beneficiary Quality Improvement Project (MBQIP) is to improve rural quality of care provided in critical access hospitals (CAHs) by increasing quality data reporting by CAHs and driving quality improvement activities based on the data. The MBQIP measure set reflects a subset of rural relevant measures from the CMS Hospital Inpatient Quality Reporting Program (HIQR) and the CMS Hospital Outpatient Quality Reporting Program (HOQR), except for: <ul style="list-style-type: none"> • Emergency Department Transfer Communications (EDTC), an NQF endorsed measure that is reported directly to state Flex programs • Antibiotic Stewardship measure, reported via completion of the Annual NHSN Patient Safety Component Survey 	<ol style="list-style-type: none"> 1. Patient Safety/Inpatient 2. Patient Engagement 3. Care Transitions 4. Outpatient 	<p>Required Measures: Patient Safety/Inpatient: OP-27, IMM-2, ED-1, ED-2, Antibiotic Stewardship Patient Engagement: HCAHPS Care Transitions: EDTC Outpatient: OP-1, OP-2, OP-3, OP-4, OP-5, OP-18, OP-20, OP-21, OP-22</p> <p>Additional Measures: Patient Safety/Inpatient: CLABSI, CAUTI, CDI, MRSA, SSIs, PC-01, proportion of patient hospitalized with stroke or pneumonia with potentially avoidable complications, Falls, Adverse Drug Events, Care Transitions: Discharge Planning, Medication Reconciliation, Reducing Readmissions, Swing Bed Care Outpatient: OP-23, OP-25</p> <p><i>Note</i> - Any MBQIP measures that are also eCQMs, must be chart abstracted to be considered reported for the purposes of MBQIP.</p>
Electronic Clinical Quality Measures (eCQMs)	Office of the National Coordinator for Health Information Technology (ONC)	Reporting electronic clinical quality measures (eCQMs) is a requirement for hospitals under the Promoting Interoperability (PI) Program (formerly known as the Medicare Electronic Health Record Incentive Program). eCQMs measure and track the quality of health care services provided by hospitals. CAHS could attest to meet the eCQM reporting requirement in 2017 but will be required to submit patient-level QRDA files for 2018 eCQM reporting. The requirement includes reporting on at least four measures for at least one self-selected quarter (90 days).	eCQMs are categorized into two of the CMS Meaningful Measures categories: <ol style="list-style-type: none"> 1. Patient's Experience of Care 2. Preventive Care 	Patient's Experience of Care: ED-1, ED-2, ED-3 Preventive Care: AMI-8a, CAC-3, EHDI-1a, PC-01, PC-05, STK-2, STK-3, STK-5, STK-6, STK-8, STK-10, VTE-1, VTE-2,
Partnership for Patients Hospital Improvement and Innovation Networks (HIIN)	Centers for Medicare & Medicaid Services (CMS)	The Hospital Improvement and Innovation Networks (HIINs), run through the Partnership for Patients (P4P), are national contracts awarded by the Centers for Medicare & Medicaid Services (CMS) which engage hospitals across the country to improve patient safety and quality, and achieve lower costs. Funding supports vigorous educational activities, quality improvement initiatives, and other resources to help hospitals.	<ol style="list-style-type: none"> 1. 20 percent reduction in overall patient harm (to 97 Hospital-Acquired Conditions [HACs]/1,000 discharges) from 2014 baseline (of 121 HACs/1,000 patient discharges). 2. 12 percent reduction in 30-day readmissions as a population-based measure (readmissions per 1,000 people) 	The HIIN measures included in this crosswalk reflect outcome measures, some of which align with defined measures through other programs, some that do not. Each outcome measure is associated with process measures as selected by the individual HIIN. <p>Core: ADE, CLABSI, CAUTI, CDI, injuries from falls and immobility, pressure ulcers, sepsis and septic shock, SSI, VTE, VAC, IVAC, readmissions</p> <p>Additional: Multi-drug resistant organisms, diagnostic errors, malnutrition in the inpatient setting, airway safety, hospital culture of safety, iatrogenic delirium, undue exposure to radiation, metric to measure/report all cause harm</p>

National Quality Reporting Crosswalk for Critical Access Hospitals

National Quality Initiatives

Initiative	Lead Organization	Overview	Focus Areas	Quality Reporting Measures (measure detail on following page)
Quality Innovation Network-Quality Improvement Organization (QIN-QIO) Priorities	Centers for Medicare & Medicaid Services (CMS)	<p>Improving Care Coordination Medicare beneficiaries experience a high rate of preventable readmissions, which are burdensome to patients and families, as well as costly. Quality Improvement Organizations (QIOs) use readmissions data from the Centers for Medicare & Medicaid Services (CMS) to assist communities in finding ways to better coordinate care and engage patients to reduce avoidable readmissions.</p> <p>Safer Care Making patient care safer is a top priority of CMS. QIOs support this goal by collaborating with healthcare providers to improve clinical processes, resulting in more effective health care that can also cost less.</p> <p>Better Data for Better Care QIOs assist health care providers with collecting, reporting and analyzing their data with the goal of improving outcomes.</p>	<p>Improving Care Coordination: 1. Reduce readmissions by 20% over three years</p> <p>Safer Care: As relates specifically to hospital care, QIOs are focused on reducing: 1. Contributing to a national goal of reducing adverse drug events (ADEs) in 265,000 lives per year</p> <p>Better Data for Better Care: 1. Provide quality improvement technical assistance and support value-based program initiatives</p>	<p>Improving Care Coordination: 30-day readmissions (READM-30-x) for the following: acute myocardial infarction (AMI), chronic obstructive pulmonary disease (COPD), heart failure (HF), total hip arthroplasty and/or total knee arthroplasty (HIP-KNEE), hospital-wide all-cause unplanned (HOSP-WIDE), pneumonia (PN), stroke (STK)</p> <p>Safer Care: Adverse Drug Events (ADE)</p> <p>Better Data for Better Care: Measures selected at a QIN-QIO level from the CMS indicators for the Inpatient Quality Reporting (IQR), Outpatient Quality Reporting (OQR) and Value-Based Purchasing (VBP) Programs*</p> <p>*Support for improvement on individual measures in the Better Data for Better Care initiative may vary by state or region.</p>
Get With the Guidelines	American Heart Association	Get With the Guidelines is a suite of programs that support the American Heart Association's mission, backed by research that affirms, "When medical professionals apply the most up-to-date evidence-based treatment guidelines, patient outcomes improve." Each program provides participants with resources including clinical tools, decision support, and a patient management tool for submitting and tracking data on measures identified by the program.	<ol style="list-style-type: none"> 1. Stroke 2. Heart Failure 3. Resuscitation 4. AFIB 	<p>Click the hyperlinks below to view measure fact sheets for each of the program areas*:</p> <p>Stroke Heart Failure Resuscitation AFIB</p> <p>*Due to the unique nature of the measures tracked by the Get With the Guidelines programs, they are not included on the "Measures" tab of this document.</p>
Hospital Inpatient Quality Reporting Program (HIQR)	Center for Medicare and Medicaid Services (CMS)	The Hospital IQR Program was developed as a result of the Medicare Prescription Drug, Improvement and Modernization Act (MMA) of 2003. Section 5001(a) of Pub. 09-171 of the Deficit Reduction Act (DRA) of 2005 provided new requirements for the Hospital IQR Program. The hospital quality of care information gathered through the program is available to consumers on the Hospital Compare website.	<ol style="list-style-type: none"> 1. Healthcare-Associated Infection 2. Chart-Abstracted Clinical Process of Care 3. Patient Experience of Care 4. Structural Patient Safety 5. Claims-Based Patient Safety 6. Claims-Based Mortality Outcome 7. Claims-Based Coordination of Care 8. Claims-Based Payment 	<p>Healthcare Associated Infection: CAUTI, CDI, CLABSI, Colon and Abdominal Hysterectomy SSI, HCP, MRSA Bacteremia Chart-Abstracted Clinical Process of Care: ED-1, ED-2, IMM-2, PC-01, Sepsis, VTE-6 Patient Experience of Care: HCAHPS Structural Patient Safety: Patient Safety Culture, Safe Surgery Checklist, Claims-Based Patient Safety: Hip/knee complications, PSI-04, PSI-90 Claims-Based Mortality Outcome: MORT-30-AMI, MORT-30-CABG, MORT-30-COPD; MORT-30-HF, MORT-30-PN, MORT-30-STK Claims-Based Coordination of Care: READM-30-AMI, READM-30-CABG, READM-30-COPD, READM-30-HF, READM-30-HWR, READM-30-PN, READM-30-STK, READM-30-THA/TKA, AMI Excess Days, HF Excess Days, PN Excess Days Claims-Based Payment: AMI Payment, HF Payment, PN Payment, THA/TKA Payment, MSPB, Cellulitis Payment, GI Payment, Kidney/UTI Payment, AA Payment, Chole and CDE Payment, SFusion Payment</p>
