Master's Level HIPAA Compliance Education for Working Healthcare Professionals, Students, and Researchers

PrivaPlan® has created a unique, hands-on curriculum to help HIPAA covered entities, business associates, students, and researchers become proficient in HIPAA Privacy, Security, and Breach Notification. Our commitment is to teach you the most efficient pathways for building, maintaining and optimizing a compliance plan/program, and compliant systems. With our dedicated subject matter experts and support teams, we provide the highest quality information and most up-to-date best practices. We go over and above standard awareness, document templates, and compliance products by tailoring our information and training to your specific situation and needs.

The PrivaPlan® curriculum includes interactive tools and activities with professionals at every level and area of healthcare to help you understand and create the customized compliance program that fits your culture and current organizational needs. With flexible self-paced learning options, real-world application concepts, tools, and ongoing support, PrivaPlan® provides the most comprehensive knowledge and training in the field.

Once you have completed the curriculum over the next 6-12 months, you will have access to continual support from PrivaPlan® for regulatory updates, online tools, and reference resources. With flexible 30-50 minute live or recorded webinars as well as practicum's, the certification program provides a deep level of understanding of best practices and HIPAA Privacy, Security, and Breach notification requirements. PrivaPlan's® own healthcare compliance subject matter experts will provide you with the education to guide your implementation plan with proven change management principles in order to sustain a culture of quality and compliance in your own healthcare organization.

Our goal is to assist you in reaching your own level of HIPAA subject matter expertise!

In addition to our educational content, we will periodically provide direct mentoring and discussions.

The PrivaPlan® Compliance Certification empowers you and your organization to:

- Shift your organizational focus from problems to prevention
- Reach higher quality and outcome value metrics
- Optimize internal management systems and workflows
- Increase patient trust
- Reduce overall compliance costs
- Improve the efficiency and coordination of all compliance efforts
- Implement and maintain best practices in data privacy and cyber security
