

THE CRHC TEAM IS HERE TO HELP!

As a participant in the Rural Connectivity Program (RCP), your organization can access CRHC's team of Quality Improvement Specialists to help you enhance care delivery. Our QIS team is available to provide customized dashboard demonstrations, give insights into patient populations, and support your team in improving your community's healthcare outcomes. We're here every step of the way to make sure you get the most out of this platform for your organization.

For more information about Innovacer, contact the Rural Connectivity Team at ruralconnect@coruralhealth.org

RURAL CONNECTIVITY PROGRAM

Innovacer Social Determinants of Health Dashboard

Innovacer's Social Determinants of Health (SDOH) dashboard provides insight into health outcomes and disparities across population groups. This dashboard identifies regional and social vulnerabilities related to access to care, transportation, food, education, employment, housing, socioeconomic factors, and lifestyle at the member and community level. By identifying challenges community members face, this tool helps teams identify high-needs populations, understand barriers to care, develop targeted interventions, and track progress towards reducing health disparities.

Population Profiling

The SDOH dashboard leverages ADI (Area Deprivation Index) data to identify regional and social vulnerabilities related to access to care, transportation, food, education, employment, housing, and lifestyle. Users can view the dashboard through the ADI lens for regional vulnerability or the SVI (Social Vulnerability Index) lens for member-level vulnerability.

Time Frame: June 2026 **Total Attributed Lives:** 451,883

Area Deprivation Index

ADI Calculated

of Lives: 36,694

Population %: 8.1

Low ADI

of Lives: 7,321

Population %: 1.6

Medium ADI

of Lives: 2,883

Population %: 0.6

High ADI

of Lives: 8,676

Population %: 1.9

Very High ADI

of Lives: 17,814

Population %: 3.9

Social Vulnerability Index

While ADI represents a geographic-level measure, SVI reflects a combination of member-level risk and community vulnerability.

SVI Calculated

of Lives: 361,455

Population %: 80

Low SVI

of Lives: 175,995

Population %: 38.9

Medium SVI

of Lives: 93,247

Population %: 20.6

High SVI

of Lives: 55,765

Population %: 12.3

Very High SVI

of Lives: 36,448

Population %: 8.1
